

Smart Energy Meter App - User Guide

Mobile app screens and normal operation.

1. Home Page

- Shows live voltage, current, power, session energy, and cost.
- Relay switch controls the smart plug output.
- Timer card can set auto OFF time.

2. Cost Page

- Shows energy cost using the unit price selected in settings.
- Unit price can be changed to match the electricity tariff.

3. History Page

- Shows saved usage records from Firebase.
- Useful for checking past energy usage.

4. Analysis Page

- Shows energy and cost analysis for selected date/time data if usage logs are enabled.
- Can help identify peak power and usage pattern.

5. Settings Page

- Set electricity unit price.
- Send Wi-Fi SSID and password to ESP32 during setup mode.
- Configure user/device settings if pairing is enabled.
